Accesolab

Accesolab办公室

◆地点: Mexico City
and carpet tiles, etc.

◆面积: 1,000 m²

◆设计师: Gabriel Salazar, Fernando Castañón

◆设计公司: usoarquitectura

◆主要材料: Drywall, glass, millwork

Accesolab is a company with 20 years of experience commercializing sophisticated equipment for research laboratories. For the design of their new corporate offices in Santa Fe – a mayor business area in Mexico City – they team worked with usoarquitectura to develop a project to outstand their leadership. The confidence of the clients in the project was transformed in a central square area for the operative zone with the private offices located close to the facades with windows.

The services section works like a screen to increase the privacy of the direction area, this section contains the assistants, site and storage areas.

Next to the building elevators, the visitor's areas were located: training, showroom, meeting and reception halls, resulting in a functional and flexible space with a vitality contagious atmosphere.

For the color palette 14 different shades of gray – both cold and warm – were selected and combined with accents in cadmium yellow, silver and white. Any suspicion caused by the selection of gray, as the central element of the palette, was minimized with the lineal pattern chosen for the carpets that elegantly combines with the woodwork in American oak colored in hot gray and plastic laminates in both gray and white.

Accesolab是一个经营研究实验室先进设备的具有20多年历史的公司。对于他们在圣达菲（墨西哥市一个较古老的商业区）的新公司办公室设计，他们与usoarquitectura合作来开发此项目，以突出他们的领导才能。客户对该项目的信心转变成一个用于操作区的中央正方形区域，而私人办公室靠近带窗户的外墙。服务区像一个屏风，增加了指导区的隐私，服务区包括助理区、站点区和仓储区。该

建筑的电梯旁是访客区：培训、展厅、会议室和接待大厅，是一个带有有机传动力氛围的灵活功能空间。在调色板方面，选择了14种深浅不同的灰色，包括冷色调和暖色调的，并且结合镉黄色、银色和白色。作为调色板的核心要素，灰色的选择所引起的任何怀疑，都因地毯的线状图案而降到最低程度，地毯优雅地结合了由美国橡木制成的鼠灰色木制品以及灰色和白色的塑料层压板。
